

Do you want to
distinguish
yourself from
other software
engineers?

Traineeship

Graduated and looking for a job? Or working in Industrial Automation and ready for a new challenge? Look no further. Search no more. We want you!

Especially for (graduated) students and job seekers we offer traineeships that will give you the perfect opportunity to distinguish yourself from other software engineers and to become our new colleague with great future perspectives.

Description

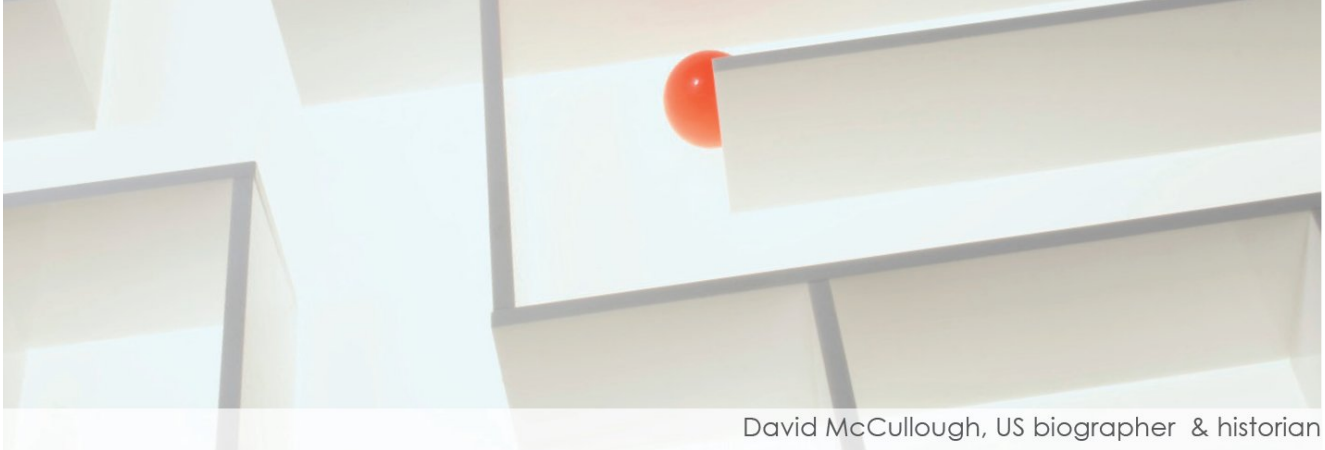

As "Trainee Software Engineer ACCOS" you get the opportunity to evolve into an ACCOS expert, this under the guidance of an experienced colleague. After a basic learning curve you will be able to work on an assignment (training-on-the-job) to adjust a process control system from one of our clients. You take care of the preparations and updating of documentation. In this manner you will investigate the user's needs and related process control assignments to translate these into suitable solutions. You accomplish software modifications and introduce new subjects to the operators. You expand your knowledge by investigating specific matters and learn by experiencing the system yourself.

Required

Candidates for the Traineeship Software Engineer ACCOS (Industrial Automation) comply with the following requirements:

- Complete (or in the nearby future) higher technical education (e.g. HBO/HTS) in area: Electrical Engineering, Industrial Automation, (Technical) Information Technology or similar education;
- Good oral and written communication skills (Dutch and English);
- Demonstrable knowledge (for example: internship or course) of PLC, SCADA & DCS is a must;
- Inquisitive and willing to invest;
- Drivers license B;
- Knowledge of ACCOS and other PLC/SCADA systems is an advantage

Real success is finding your lifework
in the work that you love*

About Opinion Technology

Opinion Technology is part of the Opinion Group, a global holding of strong, specialized players in the food industry. Even though every part has its own specialties, there is a good relationship between the divisions, which leads to exchange and optimization of knowledge and experience.

Opinion Technology is a medium-sized industrial automation enterprise. Our solutions for process-and production automation result in more productivity, more consistency and more efficiency. Our services includes drafting and working out functional specifications and technical designs, DCS, PLC and SCADA development and engineering (including ACCOS) and integration with MES. Data warehousing, tracking & tracing, acceptance tests and restarting production complete our services.

Career opportunities

Opinion Technology is always looking for motivated employees with the right skills. If you complete the traineeship with good results, Opinion Technology will offer you a permanent engagement, so you can develop yourself to Senior Software Engineer.
